Introduction

Congratulations on purchasing the **MiGO Dual Laptop!**

This innovative device features two screens, providing enhanced productivity and multitasking capabilities.

This manual will guide you through setting up and using your new laptop.

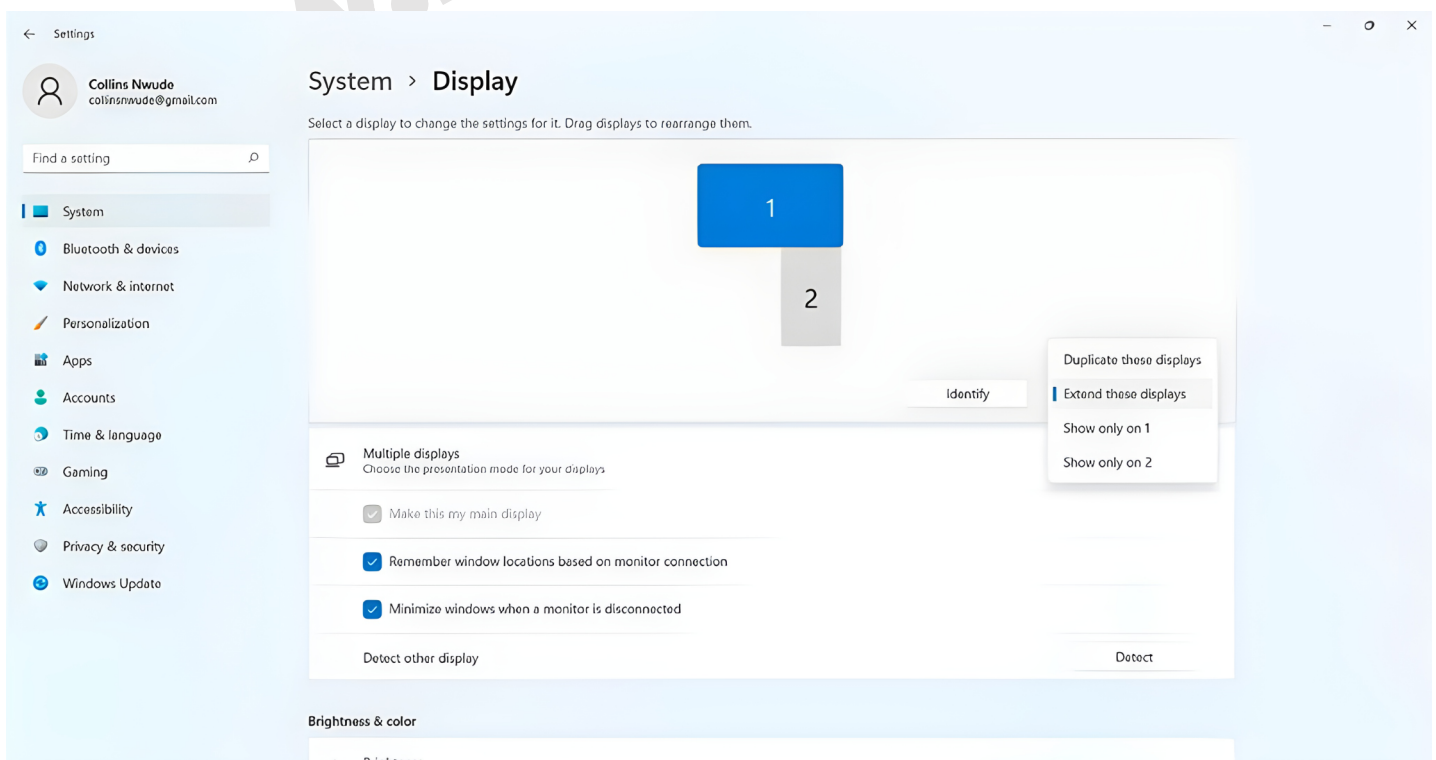

2. Setting Up Your MiGO Dual Laptop

- I. Unbox and inspect your laptop for any damage.
- II. Connect the power cord and charge the battery.
- III. Press the power button to turn on the laptop.

3. Operating the Dual Screens

The dual screens on your laptop allow for seamless multitasking. You can easily drag items between the main screen and the secondary screen.

- a. Access Display Settings: Navigate to any position on your home screen, right-click, and select "Display Settings."
- b. Choose Your Display Mode: In the Display Settings dropdown, you'll find four options:
 - * ***Duplicate this display:*** Mirrors the content of your primary screen on the secondary screen.
 - * ***Extend this Display:*** Treats the two screens as a single, extended desktop, allowing you to use them independently.
 - * ***Show only on 1:*** Displays content only on the primary screen.
 - * ***Show only on 2:*** Displays content only on the secondary screen.

- c. Working in Extended Mode: When in "Extend this Display" mode, you can seamlessly move items between screens. To do this:
- * Place your mouse cursor on the title bar of the item (file, document, browser, or application).
 - * Hold down the left mouse button and drag the item between the two screens.

To drag an item:

- I. Move your cursor to the item's toolbar.
- II. Right-click and drag the item to the desired screen (main or secondary).
- III. Release the mouse button to drop the item on the new screen

Example Use Cases:

- * Drag a web browser to the secondary screen while keeping a document open on the main screen.
- * Play music or watch videos on the secondary screen while working on the main screen.
- * Take an online course on the main screen and take note on the secondary screen

Tips:

- * You can drag items back and forth between screens as needed.
- * Experiment with different window arrangements to optimize your workflow.

4. Keyboard and Touchpad

- I. The keyboard is designed for comfortable typing. Use the function keys (Fn) to access additional features.
- II. The touchpad supports gestures, such as scrolling and zooming.

5. Detachable Webcam

MiGO Dual Laptop features a detachable webcam that can be stored in a compartment on the right side of the device. To use the webcam:

- I. Remove it from the webcam compartment.
- II. Place it on top of the laptop, where it will be secured by a magnetic holder.
- III. Position the webcam for optimal video capture.

After use, simply:

- I. Remove the webcam from the laptop.
- II. Store it safely back in the webcam compartment.

This design allows for convenient storage and protection of the webcam when not in use.

6. Ports and Connectivity

- I. **USB ports:** Connect peripherals, such as flash drives, keyboards, and mice.
- II. **HDMI port:** Connect an external display or projector.
- III. **Wi-Fi and Bluetooth:** Enable wireless connectivity.

7. Power Management

- I. Adjust screen brightness and timeout settings to conserve battery life.
- II. Use the power-saving features in your operating system.

8. Troubleshoot

- I. **Screen Issues:** Check display settings and cables.
- II. **Connectivity Issues:** Restart your laptop and check wireless settings.
- III. **Performance Issues:** Close unnecessary applications and check for updates.

9. Safety Precautions

- I. Handle the laptop with care, avoiding drops and spills.
- II. Use a surge protector to protect against power surges.
- III. Follow proper battery charging and maintenance procedures.
